

Citizen Hotline Protocols

Revised January, 2024

In 2007, the Legislature voted unanimously to establish the Citizen Hotline Program in the Office of the State Auditor. Senate Bill 5513 (codified at RCW 43.09.186) was designed to give citizens a way to “recommend measures to improve efficiency in state and local governments and to report waste, inefficiency, or abuse, as well as examples of efficiency or outstanding achievement by state and local agencies, public employees, or persons under contract with state and local agencies”.

The Office of the State Auditor values the role of the people in promoting accountability, fiscal integrity, and openness in state and local government. The Office also strives to ensure the efficient and effective use of public resources; therefore, not every submission will result in an examination by our Office.

Unless waived by the citizen, the law requires the names of those contacting the Hotline as well as any documentation to be kept **CONFIDENTIAL** until submissions are closed. *The submissions must be kept open until the audit is complete if it is named*, if the submission is anonymous, it can be closed before the audit has been completed. When closed, the public records laws apply to all documentation pertaining to the hotline.

Please contact the Hotline Coordinator if you have questions on the following protocols for the Citizen Hotline process.

Hotline Submissions

All citizen submissions will be logged into the Hotline database and assigned an individual referral number to allow for central tracking and monitoring. Intake of citizen submissions can occur the following ways:

- Web site- Citizen submission(s) will automatically populate the database.
- Letter/mail – The Hotline Coordinator will input information into the database.
- Phone – Caller to the toll-free line will get a voice message requesting that he or she leave information or provide information using the above methods. The Hotline Coordinator will oversee the input of the information into the database.
- Audit Team – Audit Managers should complete the intake form on the SAO Web site to ensure the submission is entered into the database.

Initial Assessment Process

- Hotlines submitted by or referencing a legislative member or Governor’s Office will be sent to the Director of Legislative and Policy Affairs, Deputy State Auditors and Director/Assistant Director assigned to that audit client.
- Hotlines submitted by a member of the media will be forwarded to the Director of Communications and Deputy Auditor assigned to that audit client.
- The Hotline Coordinator, will work with the appropriate Assistant Director/Director to assess the submissions to determine one of the following courses of action:
- No Action—if a hotline submission is received that is vulgar, profane, or grossly disrespectful, no action is required (Note: this is a high standard and should be applied conservatively).
- Refer the submission to the applicable state or local audit client only after the Audit Manager or designee contacts the constituent who submitted the hotline to ensure the citizen is ok with their concern being turned over to our audit client.
- Audit team *considers* in next audit, however incorporating the issue into the audit is not required if other areas of higher risk are considered a priority. Before making the final determination that this won’t be reviewed, please have a discussion with your Assistant Director. The audit team should contact the constituent who submitted the hotline informing them of the decision, then follow up with the citizen as appropriate.

Use the template letters in the attachment as a starting point for responding to the constituent:

- 5-day Initial Contact
- In litigation
- Considered in planning but not selected due to other risks identified.
- Land-use issues
- Beyond our Authority
- Criminal Activity

If in doubt, contact the Director of Legal Affairs and your Assistant Director for guidance.

- Audit team examines the concern immediately—Audit team contacts the constituent who submitted the hotline informing them of the decision, then follows up when the examination is completed. If a hotline is a fraud or a Whistleblower concern, it needs to be closed out of the hotline database and put in the appropriate database for that concern. (ex. A fraud is entered in the hotline database when it should be entered into the fraud database and closed from the hotline database.)

Follow-up Expectations

- All submissions (with an exception for anonymous submissions) will be responded to personally by an individual on the team assigned within **five working days** of the hotline being assigned to that team. The activity log needs to be updated with details of the conversation with the citizen and when the audit is scheduled to occur.
- Please speak with the Director of Legislative and Policy Affairs and your Assistant Director, before proceeding with any action regarding hotlines involving legislative members or the Governor's Office.
- No open hotline will go more than **1 year** without a follow-up contact made to the individual that submitted it. This will be reviewed at the quarterly update.
- The Hotline Coordinator will send weekly follow up emails to the individual responsible until a response is sent.

Response Guidelines:

For the initial response to the constituent, the auditor should include the following:

- 1) Timeline of when follow-up work will be completed, and if or when they will be hearing from the Auditor's Office again.
- 2) Acknowledgement and appreciation for the submission.
- 3) Contact name and number in case the citizen has questions or additional information to provide.
- 4) If a citizen requires additional time, regroup with your Assistant Director and if necessary, the Director of Legal Affairs.

If you have safety concerns when responding to or addressing citizen concerns, please contact your Assistant Director to discuss a planned response.

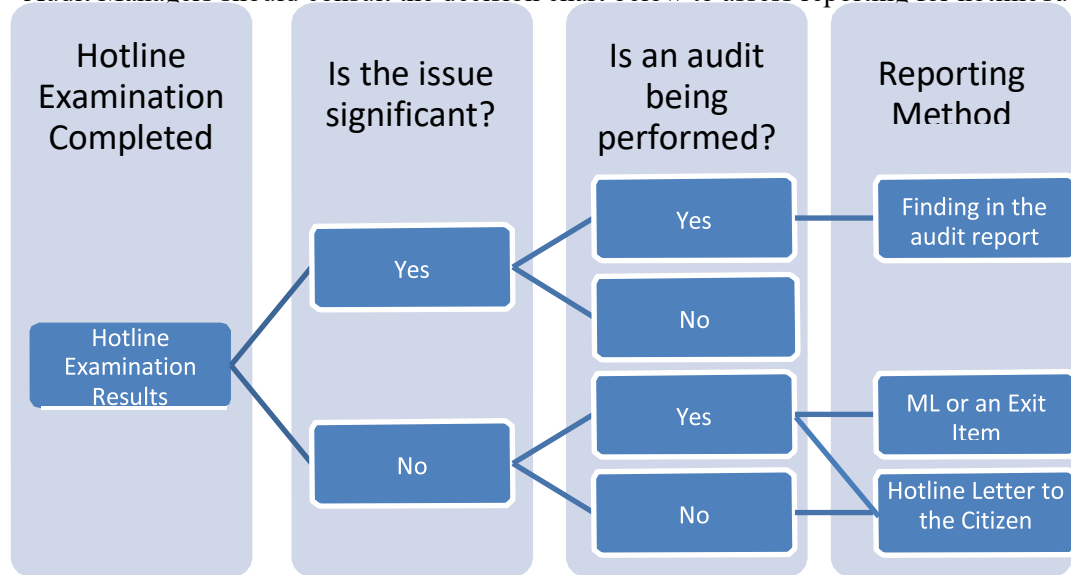

A record of constituent contact, especially verbal, should be documented with the date and included in the "Supporting Documents" tab and/or the Activity log.

Reporting Results

The results of hotline submissions should be reported timely to the citizen who submitted the hotline, the concerned entity, and other stakeholders as appropriate. Audit Managers should determine the appropriate method of reporting based on the ability to timely report the results and the significance of the issue. Audit Managers should ensure that the final reporting is attached to the hotline submission in the database under the "Supporting Documents" tab and that all fields in the database are complete.

If after completing the hotline submission review it is decided that directly contacting (i.e. phone call or meeting with them) the citizen to discuss their submission(s) would be more timely, effective, or efficient, then that contact should be documented in the “Activity Log” section for that hotline and can replace sending a closure letter explaining the results of the submission.

Audit Managers should consult the decision chart below to assess reporting for hotline submissions:

Hotline Related Work

Billing – Audit teams should charge submission review to the client’s audit budget using the project code “CITZ” to enable SAO to track all time examining citizen submissions.

Workpapers – Audit Teams should document hotline examinations in TeamMate using steps located in the TeamStore (under Special Engagements | Citizen Hotline). Audit Managers should approve workpapers prior to releasing final letters. Hotline work is normally documented in a separate folder but can be combined with other planned work so long as it is clearly noted where hotline work is being performed in the audit plan.

Management of Hotline Submissions

Audit Managers should review the submission available in the hotline database for their team and notify the Hotline Coordinator of any information that needs to be updated in the database.

Phone Conferences – Quarterly, the appropriate Director or Assistant Director and the Hotline Coordinator will conduct phone conferences with the Audit Managers to discuss the status of outstanding hotline submissions as needed.

Closing a Hotline Submission:

Each Audit Manager should review the hotline submission to be closed to ensure all proper boxes are filled out on the Referral Information tab before sending it to the Hotline Coordinator to close, including but not limited to the Client, Description, Category, and Reporting Type. This is necessary to ensure proper information is stored for our annual report and is a vital step in the process.
